Action Item 0302-02	Action Officer/ Due
Council requested a copy of the changes to Bushfire Management Zones as a result of this process	ESA On finalisation of this action within SBMP

Scott Seymour provided a comprehensive presentation on the review of the ACT Bushfire Management Zones. He detailed the overarching framework and the process for their review, including the upcoming public / community engagement strategy.

The Chair asked if the Council was able to be provided with a copy of the "Guide for identification and mapping of bushfire prone areas" document referred to in the presentation.

Council asked about the linkages between building codes (AS395) and bushfire prone mapping in accordance with the SBMP. ESA and EPPSD officials confirmed that there is a difference and there is ongoing work within ACT Government to resolve the differences. The differences are due to differing definitions within two pieces of legislation and there is no identified timeline within ACT Government to remediate this.

Council members asked about the information available online as it does not appear to be current. EPSDD noted that the information is correct as at the last approved update and new information will be loaded on the completion of the current process. It was noted that the public consultation process is not to seek approval for changes to the zones, but rather to seek feedback regarding the proposed changes. Council requested a that an updated table of the details of the changes to each zone category be provided.
